SCHELL regulating angle valve COMFORT with filter
By SCHELL.

SCHELL regulating angle valve COMFORT with filter

Optimised quality.

The combination of regulating angle valve and filter is ideal. It reliably protects high-quality fittings against tiny dirt particles from the drinking water. The angle valve with filter has now been optimised regarding mesh size, ease of movement and design.

Product description:

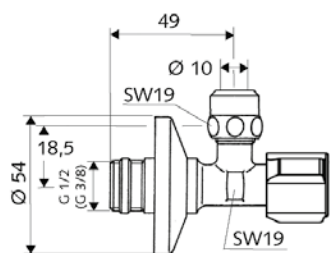

- Filter, mesh size: 250 µm
- SCHELL COMFORT handle
- Optionally with self-sealing connecting thread (ASAG easy), locking ring fitting or thread beading
- Optionally with high tension SCHELL brass compression screw connection with length compensation - flow rate class A
- Material: brass, conform to Drinking Water Regulation
- Finish: chrome

Advantages:

- Improved protection of high-quality fittings, e.g. electronically controlled fittings
- More convenient handling

SCHELL regulating angle valve COMFORT with filter
